

# Online e-cigarette store

---

England  
United Kingdom

Phone: 01772300284

The Rechargeable-smoke is a company which is based in the northwest of England, Preston, Lancashire. Here at Rechargeable-smoke we specialise in selling e-cigarettes, e-liquids and all the replacements you could possibly need from atomisers to chargers and carry cases. We established the company in March 2013 after a mass increase in the amount of people using e-cigarettes and found there to be very little competition. Rechargeable-smoke is a family run business and therefore we can keep the costs of our products down to a minimum therefore not are our customers saving from not smoking real cigarettes but they are making even further savings due to our products being so low in cost. We are strictly an online company although we do have plans to open a store hopefully in the not to distant future. Until this day arrives we would like to thank our customers for there constant loyalty and support.
