

WTA Whole Tobacco Alkaloid E-Liquid

Milwaukee
Wisconsin
United States

W.T.A. stands for "Whole Tobacco Alkaloid," a revolutionary concept in e-Liquid formulation. As compared to traditional nicotine-only e-Liquid, our WTA includes the minor alkaloids that exist in the active compounds of tobacco. This breakdown is approximately 95% nicotine, with the remaining 5% consisting of the minor alkaloids. Our e-Liquid is "WTA exclusive" which means no additional nicotine is added, preserving the tobacco leaf's natural alkaloid profile. Experience the difference. Enjoy a Wholecig!
