Here at VapourDepot, we aim to provide our products at a great affordable price, whilst continuing to be transparent about the way we carry out our business.

All of our eLiquid products are sourced from the UK, USA & EU. Using only the highest quality USP/ESP grade ingredients.

Once VapourDepot receive the materials, we will carefully create our products for resale. The majority of the eLiquids we sell are made to order. However from time to time the eLiquid may have been pre-steeped. Labels now show a 'born on date' so you know how long the eLiquid has been steeped.
