Who we are...

First and foremost we are vapers, that have come together to deliver something special to you, our friends, our customers, our community. Our specialty? Doing the grunt work for you to select only the best products the industry has to offer.

Put simply, we believe selecting vaping products should be easier than what it is. And we created a formula to make it so. We start with a process that's clever and honest. We use it to sift through thousands of products that are overwhelming the market and your ability to make the right choice. And we select only the products we would choose to use ourselves. It's not rocket science. It's just caring enough about what you're doing to do it right.

So that's Millhouse Vapour
