EGO ECig is a tobacco-free product. Factually, EGO Electronic Cigarettes works as a vaporizer. Unlike in a normal cigarette where tobacco is burnt, in the vapor cigarette, there is a mechanism which heats up the e-liquid which further turns into vapor. This vapor is "vaped", or inhaled. Basically, there's no smoke, no odor of smoke, and no carbon monoxide. All you get is just the smooth feeling of smoking a normal cigarette.

E-Cigarette Brands:: Vaporesso, SMOK, Kangertech, Eleaf and more
